Pierre, South Dakota 57501

Dear Mr. Gustafson:

I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for the State of South Dakota and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of Union County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Nicole D. Schutter

I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Roger Geary

I am a citizen of South Dakota and resident of Union County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Mike Cooper

I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of Union County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Brian Gustafson, Administrator
Air Quality Program
Department of Environment and Natural Resources
523 East Capitol, Joe Foss Building
Pierre, South Dakota 57501

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of Union County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center in its current form without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Signature

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit the state, region, and nation will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

PROGRAM

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of Lincoln County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Jeanne M. Lober

Brian Gustafson, Administrator
Air Quality Program
Department of Environment and Natural Resources
523 East Capitol, Joe Foss Building
Pierre, South Dakota 57501

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of Union County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Dear Mr. Gustafson:

I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for the State of South Dakota and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

PROGRAM

Dear Mr. Gustafson:

I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for the State of South Dakota and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

I strongly believe that this project is a great opportunity for the State of South Dakota and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit the state, region, and nation will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Greg Stillson

Dear Mr. Gustafson:

I am writing to express the support of Air Permit for the Hyperion Energy Center permit application. Please accept this letter as our formal comment requesting SD DENR approve the Hyperion Energy Center air permit. We strongly believe that this project is a great opportunity for South Dakota, the Siouxland and our nation.

We support the Hyperion Energy Center for the following reasons:

- Hyperion is committed to meeting or exceeding all environmental standards required by SD DENR;
- Hyperion is demonstrating a commitment to good corporate citizenship and community involvement;
- The economic benefit the state, region, and nation will see from this project is tremendous;
- Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit everyone in the region;
- This project allows South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Pierre, South Dakota 57501

Dear Mr. Gustafson:

I am a citizen of South Dakota and resident of ROBERTS County. I hereby submit my formal comment and ask that you approve the air permit for the proposed Hyperion Energy Center without delay. I strongly believe that this project is a great opportunity for Union County, the State of South Dakota, and our nation.

Hyperion is committed to building the most advanced and environmentally sound refinery in the United States. It is disturbing that a new refinery has not been built in this country in over thirty years. The Hyperion Energy Center will be built from the ground up using new and proven emissions control technologies. I am also comforted in knowing that Hyperion will conduct ongoing monitoring during operations to ensure compliance with the permit requirements.

The economic benefit our communities will see from this project is tremendous. Thousands of new jobs, new tax revenue and tremendous growth as a result of this project will benefit all South Dakotans not to mention allowing South Dakota to take a leadership role in helping America to increase its energy security.

Thank you for your time and diligent attention to this matter.

Sincerely,

Wayne Johnson
